*Infectious indie vibes meet
addictive rhythms*

So much of today's music is sold simply on the basis that you can remember and sing along with the tracks. This is all well and good but it doesn't really lead to a deeper appreciation of music. For that you need something more experimental and diverse and dipping into that realm can be a bit scary, as there is loads of weird stuff out there. Fortunately Head Like A Kite's debut is nothing like that and offers the reassurance of a recognisable indie vibe alongside an experimental, yet accessible depth. Admittedly, there is nothing on this record that you'll randomly sing to yourself but there is a real depth and enjoyment to this album that transcends the need for repetition.
